A CJLS attorney or paralegal can help you understand your legal rights and explain what actions you can take to solve your health care problems.

Call or visit one of our offices to find out more about how we may be able to help.

These are some examples of the types of cases the Health Care Access Project can help you with.

Eligibility for Health Insurance Programs

CJLS can explain what options are available for you to obtain health care coverage. We can help you understand the requirements for health coverage programs and help you to apply. If your application for health coverage is denied and you think the denial is in error, CJLS may be able assist you to appeal.

Prescription Medications

Our staff can help with questions or issues with Medicare Part D Prescription Drug Plans and programs that cover some Part D co-payments. We can give you information about other programs to help with prescription medicines, and we can help if you have problems getting the prescription medication you need.

Termination of Benefits

If your health benefits are terminated or suspended, we can evaluate the reasons for the termination or suspension and give you advice about what to do to restore your coverage.

Reduction in Care or Refusal of Service

If your health care coverage denies a benefit under your health plan or reduces your coverage, we may be able to help you appeal. We may also be able to help if you have trouble finding a medical provider who will perform a needed service and accept your insurance.

Medical Bills

CJLS may be able to help if you receive bills for health care that you think your insurance program should cover.

Access to Medical Records

If you need to see different medical providers and have trouble getting copies of your medical records, we may be able to help.
