

## KEEPING SAFE IN A DIGITAL WORLD

### A Simple Guide to Spotting Scams and Protecting Your Information

**Friday, December 12, 2025**

**1:00 p.m. –2:00 p.m.**

Cybersecurity often feels technical and overwhelming, but staying safe is less about understanding computers and more about understanding human behavior. This presentation cuts through the jargon to provide a practical, non-technical guide designed to defend against scams.

#### Trainers

##### **Christopher Peacock, Distinguished Engineer, Verizon**

A cybersecurity expert and distinguished engineer at Verizon, Chris is recognized internationally for his work on threat detection and cyber threat intelligence frameworks such as MITRE ATT&CK. He frequently presents and teaches at leading security conferences. His previous work experience includes jobs at Raytheon Intelligence & Space and General Dynamics Ordnance & Tactical Systems.

##### **James Borg, Chief Technology Officer, Legal Services of New Jersey**

James has worked with LSNJ since 1998. With more than 25 years of experience supporting technology in a statewide nonprofit legal aid environment, he specializes in practical cybersecurity, user education, and secure technology operations. James plays a key role in LSNJ's cybersecurity initiatives, including staff training, secure communication systems, and protection of sensitive client information.

This event is presented in partnership with **verizon**
